Professional Summary

Frontend Engineer with 2+ years of experience building scalable, responsive, and high-performance web applications using React.js, Next.js, TypeScript, and modern frontend architecture. Experienced in developing enterprise dashboards, headless e-commerce platforms, reusable component systems, real-time interfaces, and automated document workflows. Contributed to projects for brands including Berger Paints, boAt, Kohler, and PepperBall, with a strong focus on performance, maintainability, accessibility, and user experience.

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Material UI, Ant Design, Styled Components, Storybook

State and Data: Redux Toolkit, Zustand, Context API, React Query, REST APIs, GraphQL, WebSockets

E-commerce: BigCommerce Stencil, Headless Commerce, Shopify Storefront API, Payment Integrations

Performance: Server-Side Rendering, Code Splitting, Lazy Loading, Core Web Vitals, SEO, Responsive Design

Testing and Tools: Jest, React Testing Library, Git, GitHub Actions, Docker, Puppeteer, Jira, Agile/Scrum

Professional Experience

Cronix LLC

Frontend Engineer

Remote

September 2024 – Present

- Developed enterprise dashboards and customer-facing applications using React.js, Next.js, and TypeScript for clients including Berger Paints and PepperBall.
- Built data-intensive interfaces with reusable filters, tables, charts, role-based views, and real-time updates, helping users monitor operational and business metrics efficiently.
- Created server-rendered PDF workflows using Next.js and Puppeteer for invoices, reports, and business documents, reducing manual document-processing effort.
- Developed reusable frontend components and shared UI patterns using Material UI and Storybook, improving consistency across multiple client projects.
- Managed complex application state using Zustand, Redux Toolkit, React Query, and WebSockets for data-intensive and real-time interfaces.
- Improved application performance through code splitting, lazy loading, component optimization, image optimization, and server-side rendering.
- Collaborated with designers, backend engineers, QA teams, and project managers through Jira, Git workflows, code reviews, staging releases, and Agile ceremonies.

Glass Atlas

Frontend Engineer – Contract

United Kingdom – Remote

June 2026 – July 2026

- Contributed to React.js and Next.js applications for a UK-based engineering team, developing responsive and maintainable customer-facing interfaces.
- Built and enhanced reusable React components, page layouts, and frontend features within established production codebases.
- Implemented Next.js pages and application functionality while following existing component architecture, coding standards, and design specifications.
- Resolved UI defects, responsive layout issues, and frontend bugs across desktop and mobile devices.
- Collaborated through Git-based workflows, pull requests, code reviews, ticket estimation, and staging validation to deliver production-ready changes.

Marmeto

Frontend Developer Intern

Remote

May 2024 – August 2024

- Contributed to production e-commerce storefronts for brands including boAt and Kohler by implementing responsive pages and reusable UI components from Figma designs.
- Developed mobile-first interfaces using React.js, JavaScript, Tailwind CSS, and Styled Components while maintaining visual consistency across screen sizes.
- Integrated checkout and payment functionality with APIs and payment providers including Razorpay and Stripe.
- Improved page performance through image optimization, lazy loading, code splitting, and reduction of unnecessary component rendering.
- Refactored legacy class-based React components into functional components using React Hooks, improving readability and maintainability.

Selected Projects

Zoon Vale | *Next.js, React.js, TypeScript, Tailwind CSS, Supabase, Vercel*

zoonvale.in

- Designed and developed a responsive tourism booking platform for Kashmir, enabling users to explore travel packages, activities, destinations, and transportation services.
- Built reusable React components and dynamic Next.js pages with a mobile-first interface, optimized navigation, structured content, and search-engine-friendly metadata.
- Integrated Supabase to manage customer enquiries, booking information, reference numbers, and administrative workflows through a custom management interface.
- Implemented payment-related flows, form validation, responsive layouts, and production deployment using Vercel with a custom domain.

Enterprise Analytics Dashboard | *React.js, Next.js, TypeScript, Zustand, WebSockets*

- Developed a data-intensive dashboard with real-time updates, advanced filters, role-based interfaces, reusable visualizations, and exportable business reports.

Automated PDF Generation System | *Next.js, Node.js, Puppeteer*

- Built a server-side document-generation workflow for branded invoices and reports, supporting dynamic templates, structured data, and downloadable PDF output.

Education

Central University of Kashmir

September 2023

Bachelor of Technology in Computer Science and Engineering
